Project: Baker St. Pub

An existing 5,400 square foot Chili's restaurant building became the home for this new Baker St. Pub restaurant and bar. Extensive re-design in the kitchen and seating areas created the efficient, yet cozy and welcoming environment for which Baker St. is recognized. Restrooms were expanded, the bar was re-designed, exterior coolers were added, and an outdoor patio dining space was expanded. Ann worked with the owners to document the details of the existing building; designed the space to Baker St. standards; and produced final drawings for construction permitting.

Ann D. Quinn, Architect, A.W. Dunn & Co.
